

GP-1010

Gamma/Beta GM Probe

The original "Hot Dog" probe. Very good gamma/beta detector. Good energy response from 60 keV to 2 MeV. Rugged chrome plated brass housing with BNC coaxial connector for easy field replacement. Built-in rotating beta shield.

Specifications	
Compatibility	All Johnson Survey Meters and Ratemeters
Operating Voltage	900 vdc
Wall Thickness	40 mg/cm ²
Range	200 mR/hr± energy dependent
CPM/mR/hr (CS137)	1200
Energy Response	60keV-2 MeV gamma
Sensitive Area	1.1" X .308"
Finish	Chrome Plated Brass
Dimensions	1.25" diameter X 7" long
Weight	8 oz
Environmental	-20°C--60°C 5%-95% RH non-condensing--IPX4
